

# In Touch With Pink Dolphins

By Lia

## The Traveling Dolphin

I've always wanted to travel to Italy. Guess what I did? I rode on a dolphin. It was called a Pink Dolphin. I named her Lovely.

I went through the ocean with her. On the way to Italy, I saw sea animals like octopus, jelly fish, seals, sharks and whales.

While we were there, we went to Rome and by accident, we scared people on a boat by a bridge. We saw the Roman Coliseum and Lovely bought me an Italian flag. It was so cool!

I was so sad because I had to go home. I wanted to stay there longer, but I got back on Lovely and we went back home. All the way home I was talking about it and I said "thank you" to Lovely.

## Pink Dolphins

- Live in the Amazon River
- Have been found more than 1600 kilometers (1000 miles) up the river
- Also known as boto
- Have leaf-shaped teeth
- Eat squid and fish
- Are born gray and then turn to pink
