

# Going On A Narwhal Watch

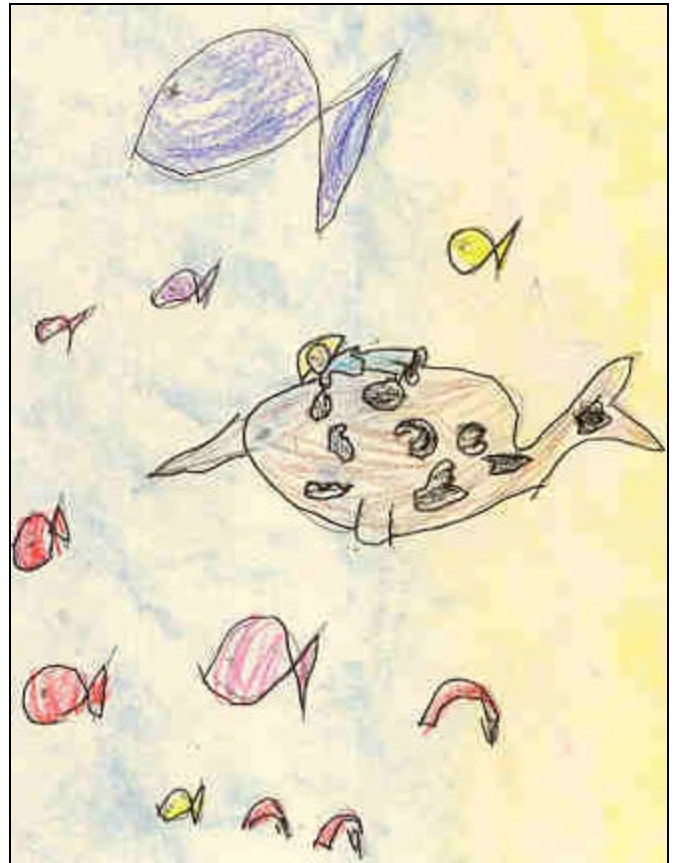

By Tiffany

## Riding With A Narwhal

I've always wanted to travel through the Atlantic ocean. One night there was a knocking on the door. It was a narwhal! He wanted to see if I wanted a ride through the ocean. I never thought this would happen.

We went through a secret path to get to the water. When we got there, we flipped through the air. It was scary when we went upside down, but it was fun too.

After a while we had to go home. It felt great to ride with a whale. We had to go home. Even though I felt sad, I had to say goodbye and then I went home to bed.

## Narwhals

- Have a small mouth and a long tusk that can be up to 10 ft.
- They can grow to be about 16 feet long
- They have a little blowhole on top of their head
- They are toothed whales and eat fish, squid, shrimp, and other marine animals
